Changes in feed or feeding rate should be made gradually over several days. Changes in feeding rate should not exceed 1 pound per day. Feed at regular times at least twice daily. If horse is hot, excited, or ill, delay feeding. Do not allow horse to over-consume or eat rapidly. An effective parasite control program is essential to your horse's health. Observe your horse's condition regularly. Consult your veterinarian if any problems arise.

**CATTLE:** Feed 1 to 2 pounds per 100 pounds of body weight daily. Provide plenty of good quality hay or pasture and fresh, clean water. Keep Lone Star® 12-12 Mineral and salt available free choice.

**CAUTION:** Changes in feed should be made gradually. Feed should be stored in a well-ventilated, dry area protected from rodents and insects. Feed is perishable. Do not feed moldy or insect-infested feed as it may cause illness or death.
