FEEDING DIRECTIONS

The recommended feeding rate for SUPER GLO® 3 is shown below. Do not feed free choice. Provide plenty of good quality hay or pasture along with a source of fresh, clean water. If you feed by dry measure, periodically weigh the feed to ensure that the proper amount is being fed. Observe the condition of your horse over a period of time. The recommended feeding rates may be increased or decreased to keep your horse in the desired condition. Changes in feed or feeding rate should be made gradually over several days. Changes in feeding rate should not exceed 1 pound per day. Feed at regular times at least twice daily. If horse is hot, excited, or ill, delay feeding. Do not allow horse to over-consume or eat rapidly. An effective parasite control program is essential to your horse's health. Observe your horse's condition regularly. Consult a veterinarian if any problems arise.
