TFP NUTRITION NACOGDOCHES, TEXAS

16% RABBIT GROW & SHOW

A complete feed designed to provide all the essential nutrients required for producing champion show rabbits.

BENEFITS

feed hay.

overall health.

enhance flavor

FEATURES

- 1109 Kcal/lb
- 16% protein
- * Alfalfa based ration * Fortified with probiotics and
- essential oils
- Yucca extract

FEEDING DIRECTIONS

16% Rabbit Grow & Show is a complete feed containing additional nutrients required for optimum reproduction, growth, and appearance.No hay or other feeds are needed.

DOES AND LITTERS: Feed free choice to lactating does and their litters. Does should consume 4 to 8 ounces per day depending

INGREDIENTS

* Nutritionally complete - no need to

* Beneficial microbes, yeast culture,

and enzymes contain in the probiotics

improves digestion, performance, and

* Essential oils contain antioxidants and

* Pelleted - easy to feed.

Dehydrated Alfalfa Meal, Wheat Middlings, Rice Hulls (14%), Rice Bran, Soybean Meal, Soybean Hulls, Cane Molasses, Magnesium Mica, Calcium Carbonate, Salt, DL-Methionine, Yeast Culture, Hydrogenated Vegetable Fat, Oregano Oil, Clove Oil, Cinnamon Oil, Red Pepper Extract, Dried Aspergillus oryzae Fermentation Product, Dried Aspergillus niger Fermentation Product, Dried Whey, Dried Lactobacillus acidophilus Fermentation Product, Dried Enterococcus faecium Fermentation Product, Dried Lactobacillus plantarium Fermentation Product, Dried Lactobacillus casei Fermentation Product, Fenugreek, Rose Hips, Yucca Schidigera Extract, Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Vitamin B12 Supplement, Riboflavin Supplement, Niacin Supplement, Calcium Pantothenate, Choline Chloride, Menadione Sodium Bisulfite Complex (source of vitamin K activity), Folic Acid, Pyridoxine Hydrochloride, Thiamine Mononitrate, Sodium Selenite, Biotin, Manganese Sulfate, Zinc Sulfate, Ferrous Sulfate, Copper Sulfate, Calcium Iodate.

upon their breed, size, and condition. The doe and her litter will consume considerably more as the bunnies mature.

WEANED BUNNIES: Litters should be weaned from the doe as soon as they are eating freely or as soon as the doe is without milk or is bred. Feed free choice to weaned bunnies.

BREEDING ANIMALS & PETS: To prevent breeding animals and pets from gaining excessive weight, limit feed to approximately 4 to 6 ounces per day. Adjust the feeding rate to maintain the desired condition. **SOME IMPORTANT MANAGEMENT PRACTICES:**

· Changes in feed should be made gradually. Sudden changes may make the rabbits sick or cause death.

When changing from one feed to another, start by mixing 1/4 of the new feed with 3/4 of the old feed. Continue to mix the feeds over a five to six day period, gradually increasing the amount of the new feed until the rabbits are eating it entirely.

• Feed regularly. One, two or three feedings per day may be used. The time of feeding each day is more important than the number of feedings. Since rabbits eat mostly at night, late afternoon or evening feeding is preferred.

· Provide plenty of fresh, clean, cool water at all times.

• Follow a strict sanitation and health program. Consult your local veterinarian or your Country Agricultural Extension Service for advice.

CAUTION: Feed should be stored in a well-ventilated, dry area that is protected from rodents and insects. Feed is perishable. Do not feed moldy or insect-infested feed to animals as it may cause illness or death.
