**FEEDING INSTRUCTIONS**

**ADULT CATS**

One 8-ounce measuring cup of Lone Star Meow For More per day will satisfy all the nutritional requirements of the average eight-pound cat. This can be fed once per day or one-half cup morning and evening. You may need to vary the serving size and frequency according to the size, age, and activity level of your cat.

**KITTENS**

Start your kittens on Lone Star Meow For More as early as they begin to nibble on solid foods (usually 3-5 weeks). Moisten the Meow For More with milk or water and feed all that your kittens will consume in 10 minutes, three to four times per day. At four months of age your young cat may be fed as an adult.

**GESTATION AND LACTATION:** Consumption will vary; therefore, feed the amount required to maintain good body condition. It may be necessary to have food available at all times.

**CARE AND WATER:** Be sure to provide adequate fresh water in a clean bowl for your cat every day. Regular visits to your veterinarian are also recommended for your cat's continued good health.

**CAUTION:** Changes in pet food should be made gradually. Pet food should be stored in a well-ventilated, dry area protected from rodents and insects. Pet food is perishable. Do not feed moldy or insect-infested pet food to animals as it may cause illness or death.
