BREEDER MINERAL with ClariFly®

A nutritional supplement containing Diflubenzuron Insect Growth Regulator for continuous feeding to cattle through the fly season. Prevents the emergence of horn flies, face flies, house flies and stable flies from manure of treated cattle.

Active Ingredient

Diflubenzuron* (CAS #35367-38-5) 0.04%

Other Ingredients 99.96%

TOTAL 100.00%

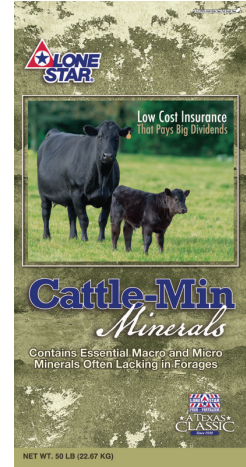

*Contains 181.6mg diflubenzuron/lb.

FEATURES

- * 3:1 Calcium to Phosphorus Ratio
- * 12% Salt
- * Chelated Trace Minerals - Zinc, Manganese, Copper, & Cobalt
- * Selenium Yeast
- * Fortified with Vitamins A, D, & E
- * Weather Protectant

BENEFITS

- * Chelated Trace Minerals and Selenium Yeast Provide Optimum Bioavailability
- * Fewer Breeder Problems
- * Healthier Calves at Birth
- * Heavier Weaning Weights
- * Supports Overall Herd Health
- * Weather Protectant Reduces Hardening and Caking - Less Waste
- * IGR interrupts the life cycle of house, stable, face and horn flies

GUARANTEED ANALYSIS

| | |
|------------------------|--------|
| Calcium (Min) | 15.00% |
| Calcium (Max) | 18.00% |
| Phosphorus (Min) | 5.00% |
| Salt (Min) | 11.00% |
| Salt (Max) | 13.20% |
| Magnesium (Min) | 3.00% |
| Potassium (Min) | 0.10% |
| Cobalt (Min) | 25 ppm |

| | |
|-------------------------|---------------|
| Copper (Min) | 2,000 ppm |
| Iodine (Min) | 150 ppm |
| Manganese (Min) | 3,600 ppm |
| Selenium (Min) | 26.4 ppm |
| Zinc (Min) | 6,000 ppm |
| Vitamin A (Min) | 200,000 IU/LB |
| Vitamin D-3 (Min) | 20,000 IU/LB |
| Vitamin E3 (Min) | 200 IU/LB |

INGREDIENTS

Calcium Carbonate, Calcium Phosphate, Processed Grain By-Products, Salt, Magnesium Oxide, Molasses Products, Vegetable Oil, Hydrolyzed Yeast, Zinc Hydroxychloride, Manganese Sulfate, Plant Protein Products, Zinc Proteininate, Manganese Proteininate, Basic Copper Chloride, Copper Proteininate, Sodium Selenite, Ethylenediamine Dihydroiodide, Cobalt Proteininate, Iron Oxide, Selenium Yeast, Vitamin E Supplement, Vitamin A Supplement, Artificial Flavor, Vitamin D3 Supplement.

FEEDING DIRECTIONS AND MANAGEMENT INSTRUCTIONS

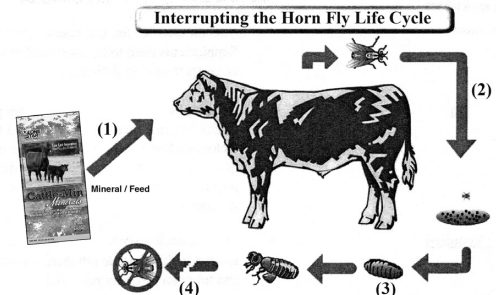

When used as directed, **Lonestar Breeder Mineral with ClariFly®** provides sufficient diflubenzuron insect growth regulator to prevent the emergence of adult horn flies, stable flies, face flies, and house flies from manure of treated cattle. Existing adult flies will not be affected. Start feeding before flies appear and continue use until cold weather marks the end of the fly season. Use **Lonestar Breeder Mineral with ClariFly®** as part of a fly control program aimed at reducing fly populations. House and stable flies can develop in decaying vegetable matter or spilled silage on premises in cattle's environment. Good sanitation practices, such as cleaning up spilled feed and preventing manure build-up around barns and fences or under feed bunks, will eliminate additional breeding sites for these flies.

Feeding Directions for Pastured Beef Cattle

Place **Lonestar Breeder Mineral with ClariFly®** in feeders close to water sources and/or resting areas. Allow free choice to cattle. Cattle should consume an average of 0.4 ounces of **Lonestar Breeder Mineral with ClariFly®** per 100 lbs. of animal body weight per day, which is the equivalent to 4 ounces per day for a 1,000 pound animal.

CAUTION: Use as directed. Consumption of selenium should not exceed 3 mg per head per day.

WARNING: This product, which contains added copper, should not be fed to sheep or any species that have low tolerance to supplemental copper.
